A TO-DO LIST THAT KNOWS YOUR DAY

Do.

Your to-dos and your calendar, on one screen.

Do. keeps what you have to do next to when you have to be somewhere. Type a task the way you would say it, give it a time, and it shows up in your day beside your meetings.

- **Free to try today** in any browser — nothing to install
- **Works offline**, and needs no account to start
- **On iPhone, the new iPhone Duo and the Mac** — one app that fits each

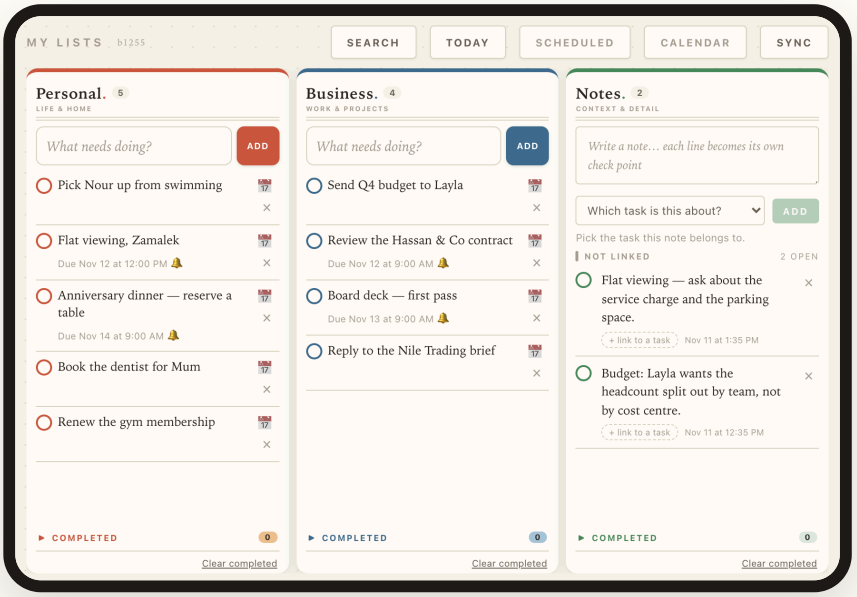

TRY IT NOW

MADE FOR THE PHONE THAT OPENS

Open the iPhone Duo and one list becomes three.

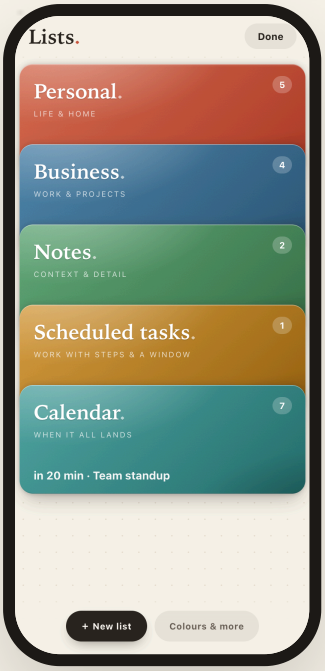

Closed, it is one list at a time. Open, Personal, Business and Notes sit side by side, with no reloading and nothing to set up.

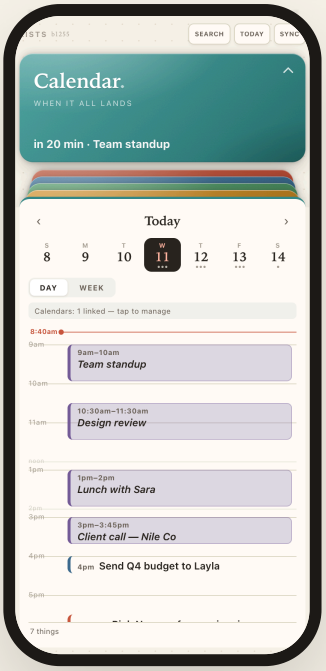

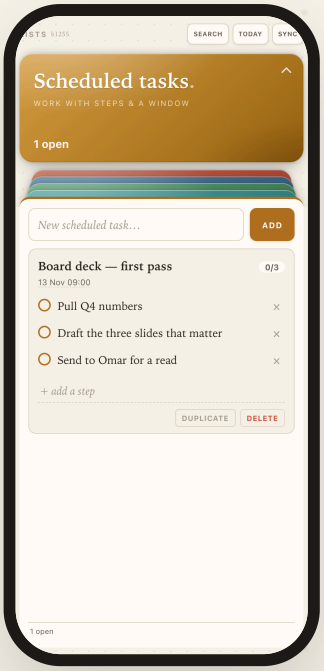

Every task and meeting in these pictures is invented.

WHAT IT DOES

Everything a day needs, and nothing else.

1

Every list is a card

Personal, Business, Notes, Scheduled tasks and Calendar. Swipe between them or tap to see them all. Add your own lists and choose their colours.

2

One timeline for the day

Link your calendar and your meetings sit beside the tasks that have a time, in the order they will actually happen.

3

Big jobs, in steps

A scheduled task holds its steps and its deadline. Notes attach to the task they are about, so the detail is where you need it.

Say it, don't set it

"Call the bank tomorrow 12pm" becomes a task with a date and a reminder.

Today

One tap shows only what is due now.

Search

Find any task or note, in any list.

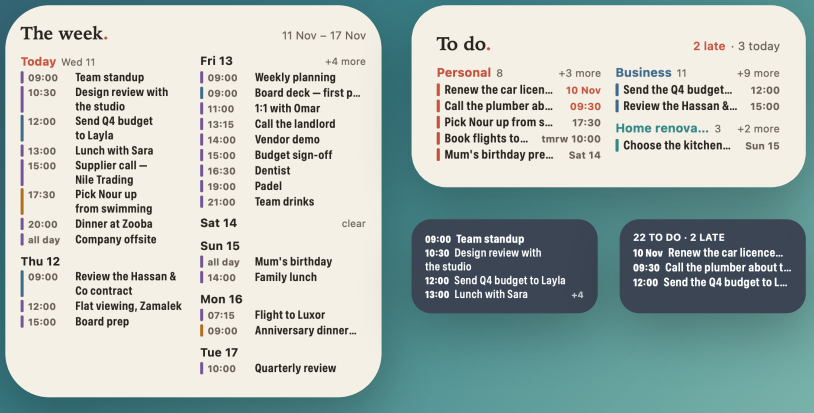

Nothing lost

Deleted items wait in Recently deleted before they go.

IN THE IPHONE APP

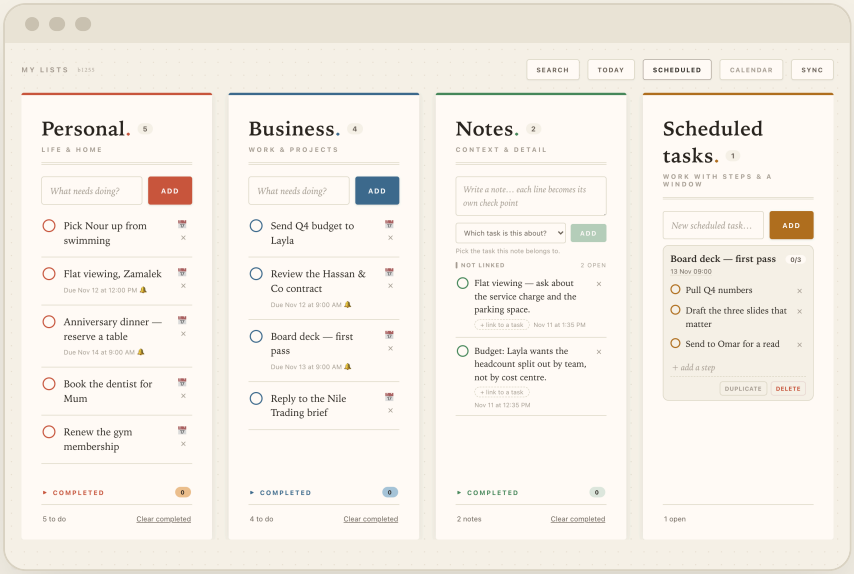

See your day without opening it

Widgets for the Home Screen and the Lock Screen: the week ahead, your lists in their colours, and what comes next.

WHAT YOU GET

Free to try today. Fourteen free days when it reaches the App Store.

The same lists on your computer

On a Mac or any laptop, every list is on screen at once. Make a free account and your lists follow you between phone and computer — or skip the account and keep everything on one device.

Try it today

1. Open **ahmedmohsen18.github.io/my-todo-list**
   in Safari on your iPhone, or any browser on a computer
2. On iPhone: tap **Share**, then **Add to Home Screen**
   it opens full screen, like an app, and works offline
3. Add your first task
   try "Book the dentist tomorrow 10am"

The full iPhone app is on its way to the App Store. That is the version with the widgets, the Lock Screen, reminders that ring with the app closed, and your iPhone's own calendar.

The price, when it gets there

BEST VALUE

Once, for good
Pay once.
No renewals, ever.

EGYPT **EGP 499**
ELSEWHERE **$9.99**

Monthly
Each month.
Cancel any time.

EGYPT **EGP 149.99**
ELSEWHERE **$2.99**

Everything works for **14 days** first, with no card asked for. Other countries pay in their own currency. The web version you can open today is free.

No card in the app

Payment goes through Apple. Do. never asks for a card and never sees one.

Your lists stay yours

If you never pay, everything you wrote stays readable and can be exported.

Private by default

Lists live on your own device. Sync is a choice, and a synced list is private to your account.
